

**Use this link to access CivitAi where you find a lot of Loras**

<https://civitai.com>

**Use this line of code in your Google Colab for Loras that don't need a Membership at CivitAi**

```
!wget -O /content/Fooocus/models/loras/retro-neon-xl-style.safetensors  
https://civitai.com/api/download/models/635271
```

**Use the following procedure for Loras that do need a Membership at CivitAi**

Use this link to go to the page on CivitAi where you can generate your personal API token once you have purchased a paid membership. The cheapest option is sufficient, and you can cancel it monthly (as of September 2024)

<https://civitai.com/user/account>

You can use this example code to load Loras that require an API code. Be sure to enter your personal **API code** exactly as it is shown to you on CivitAi. Also, change the specific **Lora number** according to the Lora you want to use

```
!wget -P /content/Fooocus/models/loras/-q --show-progress --content-disposition  
https://civitai.com/api/download/models/635271?token=kd3403799205g698xcva334  
5e7ujl9ds
```
