

Insert these codes at the corresponding sections in your copy of the Google Colab notebook, as demonstrated in the video course

```
!wget -O /content/Fooocus/models/checkpoints/realismEngineSDXL_v30VAE.safetensors  
https://civitai.com/api/download/models/293240
```

```
!wget -O /content/Fooocus/models/checkpoints/lazymixRealAmateur_v40.safetensors  
https://civitai.com/api/download/models/300972
```

It should look like this (in one line, with space in between):

```
[ ] !wget -O /content/Fooocus/models/checkpoints/realismEngineSDXL_v30VAE.safetensors https://civitai.com/api/download/models/293240
```

```
[ ] !wget -O /content/Fooocus/models/checkpoints/lazymixRealAmateur_v40.safetensors https://civitai.com/api/download/models/300972
```
