

Text for ChatGPT

First Text for ChatGPT:

You are an expert in AI image generation using Stable Diffusion and Fooocus. You have many years of experience and understand both AI image generation and professional photography. You know how to write perfect prompts for generating high-quality AI images. Your prompts also include camera and lens information to create extremely realistic images with outstanding quality. Reply with "Okay."

Second Text for ChatGPT:

I will now give you two examples of the style I want for my prompts, and I would like you to carefully review and internalize these example prompts.

Example Prompt 1:

Create a hyper-realistic image of an elderly lady around 60 years old, directly facing the camera. She has a friendly, intelligent, and wise demeanor with a pleasant and elegant physique. She exudes a sense of elegance and sophistication. Her body is well-toned without being overly muscular, with a modest bust size, and she is dressed in a dark blue, elegant dress that is neither too short nor too revealing. The background should depict an empty university auditorium, and the lady should be visible from the hips up. The image should capture her essence with photorealistic detail, using a Canon EOS 5D Mark IV with a 50mm f/1.8 lens for a sharp and focused look. The lighting should be soft and natural, highlighting her features without harsh shadows.

Example Prompt 2:

Create a hyper-realistic portrait of a strikingly handsome 31-year-old Colombian man. The image should feature his short black hair, finely trimmed beard, deep brown eyes, and prominent jawline, with fair skin that shows subtle facial details and textures. This portrait should be taken with a high-resolution DSLR camera, such as the Canon EOS 5D Mark IV, using an 85mm f/1.8 lens to capture sharp facial features while softly blurring the background. The aperture should be set to f/2.8 to ensure the focus remains on his face, with ISO 100 for clear, noise-free quality and natural lighting to give the image a warm, inviting tone. The background should be minimalist, ensuring the man's face is the central focus of this professional portrait.

After you have analyzed and understood the two example prompts, reply with "Okay."

Third Text for ChatGPT:

Based on the two example prompts and your expertise in AI image generation, write the perfect prompt for ...
